

# Take control and stay on top of safety.

Healthy indoor air is even more important today.

Air indoors is often up to five times worse than outdoors. It impacts the health, safety and productivity of people. Moreover, poor air increases the risk of viruses (such as the coronavirus) surviving and being transmitted through the air.

Employees who are continuously exposed to various pollutants in the air are more likely to get sick, perform poorly, and miss work. Research has shown that poor indoor air costs companies at least US\$1,000 per employee per year due to productivity loss.

uHoo helps you take control of these situations and stay on top of safety. By having the proper tools to address air quality, you can make better decisions to enhance the health and well-being of people at your workplace.

# Take control with uHoo Business

uHoo Business, together with uHoo Aura, monitors and manages the air you breathe.

## 1. Provide hope

By detecting the risk of the coronavirus so that appropriate action can be taken to reduce risk, improve the environment and create peace of mind.

## 2. Reduce anxiety

By being transparent to your employees through sharing of relevant air quality and virus risk data.

## 3. Enhance wellness

By monitoring air quality to help create a healthy, safe and comfortable environment.

## 4. Simplify management

By providing a consolidated view of all your locations on one screen so that you can easily identify and address any air quality issues.

## 5. Reduce risk

By providing a real-time assessment of coronavirus and air quality risk so you can immediately take action to reduce any risk.

## 6. Integrate

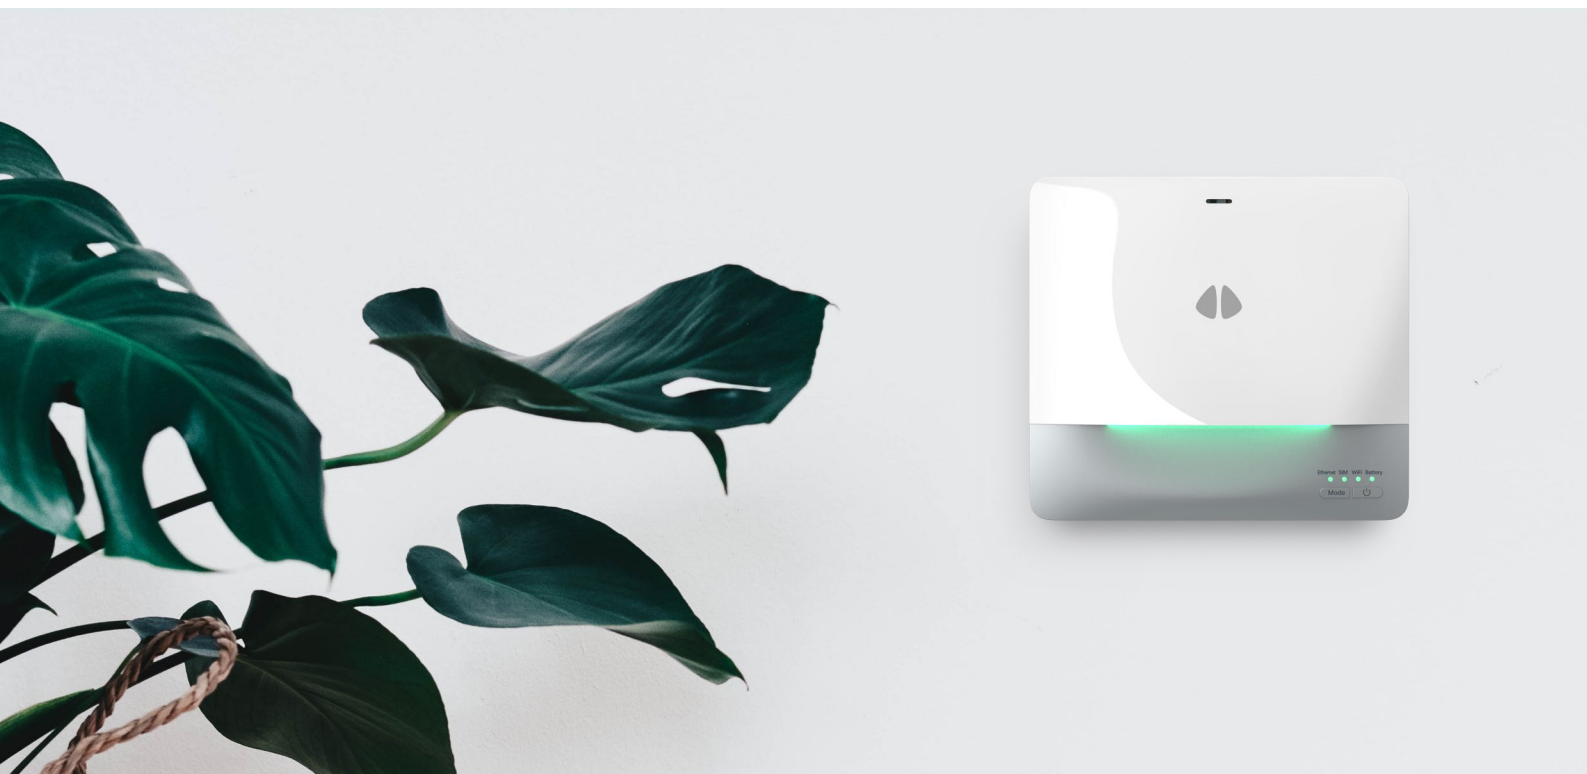

By connecting uHoo Business with your HVAC system or building management system to automatically control and manage your heating, cooling, ventilation and fresh air.

## 7. Reduce cost

By identifying and addressing air quality issues immediately to reduce employee absenteeism, increase productivity and prevent wear and tear of your equipment.

## 8. Be Informed

By having real time access to all your air quality data, tips on how to improve your offices, and case studies on how other uHoo customers have benefited.

# uHoo Aura, the best-in-class environment monitor

Know what you're breathing through the 13 parameters\* that uHoo Aura measures.

Temperature

Relative Humidity

Carbon Dioxide (CO<sub>2</sub>)

Chemicals (VOCs)

Carbon Monoxide (CO)

Dust Particles (PM<sub>10</sub>)

Dust Particles (PM<sub>4</sub>)

Dust Particles (PM<sub>2.5</sub>)

Dust Particles (PM<sub>1</sub>)

Formaldehyde

Air Pressure

Light (Lux)

Sound

\*Option to upgrade to measure up to 15 parameters that include nitrogen dioxide, ozone, sulfur dioxide, oxygen, hydrogen sulfide and ammonia

# Safeguard your environment against the coronavirus with the uHoo Virus Index™

The uHoo Virus Index™ utilizes AI-powered insights based on scientific research to provide a real-time risk assessment of the coronavirus surviving and becoming transmittable in the air. With this information, you would know which specific actions to take to reduce your coronavirus risk.

The uHoo Virus Index™ is based on a comprehensive analysis of multiple air quality factors. The safety thresholds are based on scientific research conducted by organizations such as the World Health Organization (WHO), the Occupational Safety and Health Administration (OSHA) and other scientific publications conducted by various scientists and universities.

The uHoo Virus Index™ ranges from 1-10, and sub-categorized into four levels:

## 1 to 3 (Good)

Virus survival is low and transmission through the air is unlikely.

## 4 to 6 (Mild)

Virus survival is moderate and transmission through the air is possible but air quality poses little to almost no direct health risk for people who are not sensitive to air pollution.

## 7 to 8 (Bad)

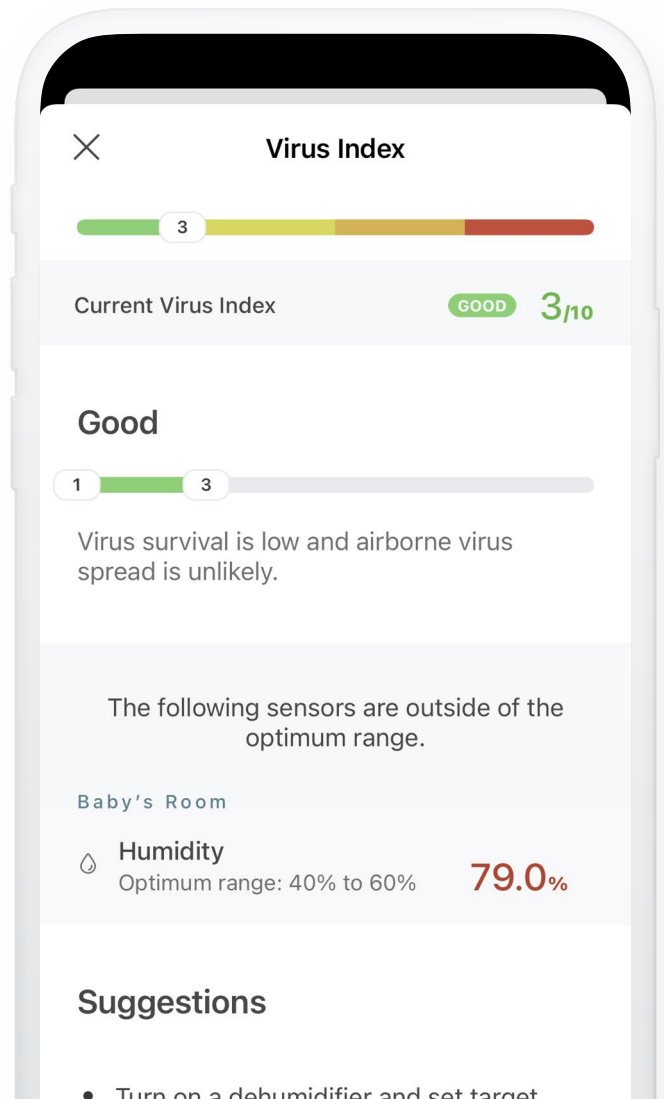

Virus survival is prolonged and transmission through the air is likely. Air quality poses some health risk.

## 9 to 10 (Severe)

Virus survival is high and transmission through the air is likely. Air quality would affect most people.

Reducing coronavirus risk is priority. uHoo helps you make better decisions in creating a safer and healthier workplace.

# Create a healthy workplace and stay ahead of your game

uHoo provides you with accurate information and directions on how to properly take control of the air you breathe. With uHoo Business, you can easily transform your air quality data into actionable insights and improve the health, well-being and productivity of your team.

## Take control with uHoo Business and #StayOnTopOfSafety

Take your first step to a healthier, safer and more productive workplace.

Partner with us and future-proof your business.
